

To Whom It May Concern,

My name is Stephen Murphy and I am a fifth year Computer Science major at The University of Central Florida. Thank you for considering me for a position as an intern.

Throughout my childhood and into early adulthood I have changed schools, houses, and cities, but there has always been one constant. I have been interested in computers and programming my entire life. From attempting to learn C++ in 7th grade to more sophisticated projects recently such as creating an event management website and database as a class project (using Github for content control), I am constantly looking for ways with which to challenge myself and gain new skills.

Working on multiple programming tasks in past internships has developed my problem solving skills and given me valuable, real world experience in the industry. With the experience I have gained from those past internships, including most recently a software engineering internship at Mainstream Engineering, I am confident that I can contribute meaningfully to your programming teams while continuing to gain valuable experience in the field. As you will see in my résumé, I have several years of experience with Java, C, HTML, JavaScript, and other programming languages such as SQL and PHP. I have worked on several notable projects, the greatest of which is that I am currently starting on an android mobile application to manage the tasks commonly associated with living with roommates such as scheduling chores or creating communal grocery lists, creating a virtual machine, developing www.ottobonapp.com, and creating an event management website.

In addition to my programming experience I have been an Uber driver for the past six months and have worked as a Building Manager at the UCF Student Union for the past three years. This job has allowed me to develop many skills which would be useful as an intern. I am proficient at time management, working with and communicating my ideas with others, and picking up on new technologies at tremendous speeds.

Pair these skills with an unquenchable desire to learn and experience new opportunities and I believe you have the perfect candidate for this internship.

If you deem me qualified for this position or have any questions for me, please give me a call at 904-305-3976. Thank you for your consideration and for taking the time to read this letter.

Sincerely,

Stephen Murphy
